

HEEBA ANJUM HOSUR

Product Manager | Growth, Analytics & AI-Driven Execution

heebaanjum25@gmail.com | +91 9538379507 | Bengaluru, India | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Product Manager who owns end-to-end delivery for cross-functional teams, driving measurable gains in release predictability, UX conversion, and data integrity. Partners directly with engineering on APIs, security, and system design, while building AI-assisted capabilities — from content moderation to analytics — into the product surface. Data-driven, roadmap-focused, and increasingly working at the AI/product intersection. Seeking Technical PM, AI PM, Growth PM or Product Owner roles.

SKILLS

- **Product Management:** Product Lifecycle Ownership, PRDs & User Stories, Roadmapping, Backlog Prioritization, Sprint-Based Delivery, Stakeholder Alignment, Release Management
- **Analytics & Experimentation:** Google Analytics, Google Search Console, Matomo, Microsoft Clarity, Funnel & Conversion Analysis, Data-Informed Decision Making, Ahrefs, SEMrush
- **Technical Fluency:** HTML, CSS, JavaScript, React JS, Express JS, MongoDB, API Testing & Documentation, SonarQube, New Relic, GitHub, System design fundamentals, AI/ML concepts
- **Product Discovery & AI Tooling:** Figma, Competitive Teardown & Customer Research, Prompt Engineering and Prototyping using Claude, ChatGPT, Gemini, Lovable

PROFESSIONAL EXPERIENCE

Junior Product Manager — Ultimez Technology

Aug 2024 – Present | Remote, India

- Directed 4-7 members cross-functional teams (engineering, design, QA) through end-to-end feature delivery and sprint cycles, **improving release predictability and reducing delivery slippage by 15-20%**
- Analyzed heatmaps, session recordings, and analytics across 4 tools to identify UX friction, prioritized fixes, and **reduced bounce rate by 10-15%**
- Audited SEO performance, identified keyword/content gaps, and **recovered 10-20% of dropped keywords**
- Validated APIs, partnered on code-quality reviews, and audited data integrity using database queries, **reducing post-launch bugs and catching 10+ discrepancies before production**
- Hardened web security across authentication, firewall, and access controls, **addressing 5+ identified security gaps**
- Built developer-ready wireframes/prototypes and used structured AI prompting for requirements, **reducing design-to-development clarification cycles and documentation time by 20-40%**
- Benchmarked competitors and ran comparative UX testing, **identifying 10+ feature/UX gaps and 8+ friction points to inform prioritization**
- Authored functional specs for comparison, filtering, geolocation discovery, and engagement features (watchlist/save-for-later), **contributing to 10-15% of quarterly roadmap initiatives**
- Designed subscription and onboarding flows, **targeting a 10-15% reduction in drop-off**, while improving location-based content relevance and repeat engagement
- Designed internal admin dashboards, content workflows, filtering, and AI-assisted moderation, **reducing manual review effort and improving curation efficiency**
- Proposed AI-driven analytics, preference-based personalization, and conversational query features, **targeting broader analytics accessibility, higher engagement, and 20-30% faster time-to-insight**
- Tested web and mobile platforms in parallel, logging **20+ critical/high-severity bugs** and auditing registration UX to **eliminate 5+ inconsistent user paths**

CASE STUDIES & INDEPENDENT PROJECTS

Swiggy Instamart — Discovery & Onboarding Teardown (Self-initiated Case Study)

- Ran a competitive UX teardown of Instamart vs. Blinkit and Zepto, **isolating 3 friction points costing ~29s in time-to-cart-add (65s vs. 36-41s)**, then authored a PRD-style fix with a **target reduction to ≤35s**

WhatsApp Communities vs. Instagram Channels — Competitor Teardown

- Led a competitive teardown **decoding retention-driving UX patterns and shipped a prioritized feature roadmap** via Impact-Effort analysis

Voice of Customer Co-pilot — AI Feedback Analysis Tool

- Built an AI-powered tool (React, Gemini API) that clusters customer feedback **into severity-ranked themes with automated citation validation to prevent AI hallucination**, enabling evidence-backed product prioritization.

EDUCATION

B.E., Computer Science — Dayananda Sagar College of Engineering

Bengaluru, Karnataka | 2024

Diploma, Computer Science — KLE Technological University

Hubli, Karnataka | 2021
